## EDUCATION

### WORCESTER POLYTECHNIC INSTITUTE (WPI)

BS in Robotics Engineering  
Minor in Game Design  
Expected May 2017 | GPA: 3.50

## COURSEWORK

### ROBOTICS

Digital Circuit Design  
Embedded Systems  
Static and Dynamic Systems  
Robotic Sensing  
Robotic Navigation  
Industrial Robotics  
Controls Engineering

### COMPUTER SCIENCE

Object Oriented Design  
Software Engineering  
Artificial Intelligence  
Webware

### GAME DESIGN

Game Design Process  
Storytelling in Interactive Media  
Novel Controllers and Interfaces

## SKILLS

### SOFTWARE

Languages:  
C# • C • Java • HTML5  
CSS3 • JavaScript • Python  
RAPID • MatLab

Tools and Utilities:  
ROS • Linux • Git  
Visual Studio • Unity3D

### HARDWARE

Soldering • Arduino  
Mechanical Analysis  
Circuit Analysis

## ACCOLADES

- 2013 - 2016 | **Dean's List** from Undergrad Admissions
- 2016 | **Best College Alpha** from MassDiGI Game Design Challenge
- 2016 | **Chosen to Showcase** at Boston Festival of Indie Games

## PROJECTS

### HEIST NIGHT | LEAD PROGRAMMER / PROJECT HEAD

- Ongoing | Winner of "Best College Alpha" and Chosen to Showcase at BFIG
- Digital board game featuring stealth mechanics only possible with a video game.
  - Locally hosts HTML5 content server at game runtime.
  - Players scan on-screen QR code to connect with mobile devices, which serve as private game screens without needing a companion app.
  - Features custom Unity3D-to-HTML5 WebSocket networked communications.

### INTERACTIVE SEGWAY ROBOT | PROGRAMMER / UI DEVELOPER

- Ongoing
- Provide automated registration for walk-in patients and/or visitors through an intuitive onboard UI that interfaces directly with ROS.
  - Connect with hospital database to automatically assign patient a room, escort them there, and alert a doctor to tend to them.

### GALDOR: VR FORTUNE TELLER | PROGRAMMER / DESIGNER

- Fall 2016
- Seated Virtual Reality experience built for the GearVR in under 24 hours
  - Features custom-built input system that parses head nods or head shakes as input, instead of requiring the user to press any buttons.

### WPI MAPPER | DEVELOPER TOOLS PROGRAMMER / PROJECT MANAGER

- Fall 2015
- Calculated A\* routes around campus based on map networks stored remotely.
  - Featured developer tools that allowed multiple people to edit map server data without conflicts.
  - Programmed in 7 weeks with a randomly assigned team of 9 students, using Agile development techniques.

### ROBOTIC FIREFIGHTER | MECHANICAL DESIGNER / PROGRAMMER

- Spring 2015
- Autonomously navigated randomized mazes to locate and extinguish a fire.
  - On-board odometry equipment tracked and reported robot and fire position.
  - Designed, programmed and built in 7 weeks.

## WORK EXPERIENCE

### LEGO | BRICK SPECIALIST

- June 2015 – Present | West Nyack, NY
- Delivering exceptional customer service.
  - Running periodic store events to help foster building skills in children.

### CONTRACT WORK | ELECTRONIX ONLINE TUTOR

- January 2016 – July 2016 | University of Memphis
- Helped design mock-up interfaces for tutor program.
  - Constructed webpage framework.
  - Worked and coordinated with a distributed team.

### EMAGINATION COMPUTER CAMPS | TECHNOLOGY COUNSELOR

- June 2014 – Aug 2014 | Waltham, MA
- Taught technical skills to children aged 7 to 17 in daily classes, including programming and game design.
